# WHAT'S NEW?

Each year, as our portfolio expands, we are able to reach a wider audience and impress them with our products. The key to our success is an in-depth understanding of our customers' needs, combined with many accumulated years of manufacturing know-

how, and the application of game-changing technologies and materials. This leads to user-focused products, that not only enhance their experience but also push the boundaries of what's possible - with consistently improving sustainability.

## NO-COMPROMISE WEIGHT, DURABILITY, AND COMFORT.

Our expectations from alpine equipment these days are matched only by the feats of professional alpinists themselves. It's something that high-altitude climber, expedition leader and

deuter athlete Tamara Lunger is keenly aware of. Modern alpine backpacks need to be as light as possible to minimize the load on tough, energy-sapping projects, and ensure unencumbered freedom of movement. They also need to withstand sharp rock and keep contents safe on dusty transit routes. Because the last thing you need on challenging expeditions is faulty or damaged gear. And what about the carrying comfort? When it comes to performance equipment, it's an aspect that's often overlooked. So how can you combine minimal weight with maximum durability and superior carrying comfort? It's a challenge that our product developers and designers have relished tackling together with Tamara Lunger. And part of the solution lies in Dyneema®. This ultra-tough textile fiber is 15 times stronger than steel; it's waterproof; UV- and chemical-resistant; and so light that it floats on water. In addition, buckles and hooks made from super-robust, unbreakable aluminum provide an elevated level of security and reliability. And the proven deuter Alpine back system delivers fully unrestricted range of movement and very good carrying comfort. **The outcome? Two extremely tough, ultralight, highly-functional and comfortable alpine backpacks for alpinists who keep pushing themselves and their ambitious projects.**

**GUIDE ULTRA 24 SL UND 26**

for ambitious, professional-level, single-day mountain routes - tested and developed in collaboration with Tamara Lunger.

**EXPEDITION ULTRA 60 AND 60 SL**

for tough expeditions in challenging conditions - tested by deuter athlete and world-class speed alpinist Dani Arnold.

## THE BACK SYSTEM OF THE FUTURE

We wouldn't be market leaders in backpack carrying comfort if it weren't for the persistent fine-tuning of our back systems. New, innovative materials and a sustainability-focused approach play a key role in the process. And the same goes for the new **Hiline 8 and 14** bike backpacks. By teaming up with Oechsler, a leading polymer technology company, we have come up with the back system of the future. Based on our proven Airstripes back system, where the foam element is now replaced with a **3D printed, open-cell skeleton structure** made from EPU. This has multiple advantages: the precise nature of 3D printing cuts waste (down to max. 3%) which increases efficiencies and makes it more sustainable. We've taken a well-balanced and minimized selection of materials and created an especially lightweight yet durable mountain biking backpack that delivers a fantastic balance of comfort and weight. The material is even more porous for maximum airflow across the back. The EPU back padding material adapts perfectly

to the shape of the body, and together with the snug vest-style shoulder straps and the part-elasticated sternum strap and elasticated waist belt, it creates a snug, compact fit on the back for the most technically demanding trails. The built-in back protector in memory foam provides reliable protection for the spine, which makes it suitable for enduro racing.

**HILINE 8 AND 14**

## NEW LIGHTWEIGHT BACK SYSTEMS

**SPEED LITE PRO SERIES**

The **Speed Lite Pro** has also seen new developments in its back system this season. Minimal weight and load transfer are the main aims of this backpack for ambitious hikers who want to keep things fast and light in the mountains. And the new LiteAir back system now has a lightweight, specially molded back panel with a complex ventilation framework and channels that keep air flowing across the back, plus a reinforced structure to help transfer the load. Its flat-format construction creates a body-hugging fit and offers good flexibility for maximum range of movement across a range of terrain types. Thanks to its special construction and removable back panel, the LiteAir back system is one of the lightest in its class.

# LIKE A SECOND SKIN FOR ENDURO RIDING

Keeping a low center of gravity - and then pedaling as hard as your legs will go. Ambitious gravel bikers and XC mountain bikers need to maintain a dynamic position in the saddle. And so, standard touring or enduro backpacks are not always the best solution. Minimal weight and maximum range of movement are key here.

Which is why vest-style backpacks such as those used in trail running are seeing increased popularity with cycle sports enthusiasts. The new **Rogla 5** is the ultimate solution for challenging endurance rides. The vest-style design wraps around the body like a second skin for better aerodynamics. The sternum straps and the elastic side strap by the ribcage are precision adjusted to the torso for a snug fit without restricting breathing, no matter how hard you're pushing. And with space for a 2-liter hydration bladder plus a rain jacket, energy bars, cell phone and tool kit - everything you need for a bike marathon or gravel race. It certainly packs a big punch for such a small pack!

ROGLA 5

# MADE BY BACKPACK PROFESSIONALS FOR PHOTOGRAPHY PROFESSIONALS

Camera backpacks aren't a new thing. But ones that are designed for the rigors of alpine use - be it mountaineering, skiing, snowboarding, or biking - are less common. It's not that simple to combine the requirements for hauling camera gear around, with those of a high-quality outdoor backpack. Which is why we jumped at the chance to have a full rethink of what makes an outdoor camera backpack. With our extensive experience in alpine backpack designs and working in collaboration with professional outdoor photographers and filmmakers, we've now come up with a highly-versatile, adventure-ready camera backpack. With its many functional features, the **Jaypack Pro 34+14** makes it a joy to work in the most challenging terrain and weather conditions - climbing, hiking, mountaineering, biking, or boarding. This is a comfortable-to-carry, cleverly designed, water-repellent and hard-wearing camera backpack. Which means you can direct your full focus on capturing images and videos.

JAYPACK PRO 34+14

# DEUTER TRAINING GOES DIGITAL

## GET THE FACTS DIGITAL

deuter's retail training now includes eLearning - a smart way of increasing product knowledge for the whole team. So you can stay up to date with everything deuter-related, or quickly bring new employees up to speed. And it's mobile too. Because the more knowledge you have, the more we all benefit.

SCAN THE QR CODE

## 3D CYCLE FOR A RESPONSIBLE APPROACH

As part of the deuter Promise, we are committed to sustainable business practices and activities across the board. Because businesses play a key role in promoting economic, environmental, and social change. Especially when it comes to complex industries like ours, commercial decisions can have fundamental and wide-ranging effects on people and nature. In order to recognize, prevent, or mitigate any potential or actual negative impacts of

our actions, we comply with both the guidelines of the OECD (Organization for Economic Co-operation and Development) and the FWF (Fair Wear Foundation) for responsible business conduct. These help businesses across the world to manage and mitigate the negative impacts of their activities, supply chains, and other business relations with regards to workers, human rights, the environment, corruption, and consumers.

### ONE OF NATURE'S UNIQUE QUIRKS.

Did you know that the 25,000+ types of lichen in the world form an effective partnership between fungi and algae, enabling them to colonize habitats they would not be able to on their own? They are living proof that together we can achieve more, and that an effective network allows all parties to benefit. It's a quirk of nature. And serves as an example for us.

## 3D CYCLE DEUTER DUE DILIGENCE CYCLE

To meet our due diligence obligations and to monitor and evaluate our business activities and actions at all times, we have set up what we call our '3D Cycle'. It is made up of the following six steps:

### 1. DEUTER PROMISE POLICY

Responsible business practices are firmly anchored in our guidelines and management systems and documented in the deuter Promise.

### 2.

In it, we identify and assess potential risks that our manufacturing and business practices could have on human rights, workers' rights, and environmental concerns, that may affect us as well as our supply chains and business relationships.

### 3.

We then take measures, such as reviewing and adapting supplier contracts or introducing employee training schemes to put an end to, prevent or mitigate these negative effects.

### 4.

We track the progress of any implemented measures and regularly monitor results so we can ensure that targets are being met.

### 5.

We communicate transparently about how we are dealing with any identified risks and impacts to inform stakeholders about our efforts, and we provide a full progress account in the deuter Promise report.

### 6.

We establish mechanisms or work together with stakeholders to come up with appropriate solutions to redress any adverse impacts.

## OUR PARTNERS

**WE MANUFACTURE ACCORDING TO BLUESIGN® STANDARDS, TO PROTECT PEOPLE AND PLANET**  
Since 2008 we've used the bluesign® system standard, the world's strictest standard for environmental protection, occupational safety, and consumer protection in the textile industry.

**FAIRNESS FROM A TO Z WITH THE FAIR WEAR FOUNDATION (FWF)**

We have held FWF membership since 2011, a multi-stakeholder initiative that works together with companies and factories to improve working conditions in textile and garment factories. We have achieved FWF Leader Status every year since 2013. And in 2022 we were awarded the German Sustainability Prize in recognition of our long-lasting collaboration with our suppliers.

**PARTNERSHIP FOR SUSTAINABLE TEXTILES - UNITED FOR GREATER SUSTAINABILITY**

We have been members of the Partnership for Sustainable Textile since 2014. The initiative brings together stakeholders from business, civil society, standards organizations, and trade unions under one umbrella.

**GREEN BUTTON FOR GREEN PRODUCTS**  
To help protect people and planet, deuter collaborates with the international "Green Button" (Grüner Knopf) standard. Initiated by the German government, it is the world's first state-supervised certification mark to establish compliance standards for sustainably produced textiles.

**RESPONSIBLE DOWN STANDARD (RDS) - FOR THE LOVE OF ANIMALS**

Even sustainable natural materials have to be produced in an environmentally responsible way. That is why, since 2015, we've exclusively used high-quality feathers that are Responsible Down Standard certified for all of our down sleeping bags. This requires animal welfare and farming practices to be traceable throughout the entire production chain.

**SUSTAINABLE DEVELOPMENT GOALS - GLOBAL GOALS FOR A SUSTAINABLE FUTURE**

The UN's 2030 Agenda is a comprehensive roadmap to a peaceful, sustainable, and prosperous world for us all. It is based on 17 Sustainable Development Goals (SDGs), which we use to guide us in shaping our sustainability agenda.

**TOGETHER WE ARE STRONGER REDUCING AND OFFSETTING**  
To achieve our climate goals, we are working together with the international experts at ClimatePartner. From 2025, all deuter products will be ClimatePartner certified.

## OUR OWN INITIATIVES

We are especially proud of the sustainability initiatives that we have undertaken ourselves and which we have already been successfully implementing for some time. These are further grist for the mill in realizing our vision and our holistic, fully integrated road to sustainable business practices.

### FREE FROM PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS)

All deuter products have been free from PFAS since 2021. Since then, deuter has used an environmentally friendly finish that produces the same high standards in water and dirt repellency, but which is also harmless to human and animal health.

### LIFELONG REPAIR SERVICE

We offer our customers a lifelong repair service in order to extend the usable lifetime of our products and thereby help conserve natural resources. In 2023 we shipped around 20,000 spare parts and mended 6,300 products worldwide - which equates to roughly 17 repairs a day. For us, there is no doubt: it's better to make do and mend, than throw something away.

**For more information head to our website [www.deuter.com/int-en/responsibility](http://www.deuter.com/int-en/responsibility)**

## SL-COLLECTION

### Female specific packs

#### DEUTER SL-TEAM

deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines /sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward - also when it comes to developing products.

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

#### SLIM-CUT SHOULDER STRAPS

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

#### CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

#### SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

Standard Fit

## EL-SERIES

### Extra Long Series

#### THE DEUTER EXTRA LONG SERIES

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and -women between 1.85 - 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm.

Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

Standard Fit

# DEUTER BACK SYSTEMS

deuter has developed different systems specifically adapted to the various sports and their specific demands.

HIKING / TREKKING

## AIRCOMFORT BACK SYSTEM

**MAXIMUM VENTILATION**  
thanks to the gap created between the mesh and a person's back.

**STEADY LOAD DISTRIBUTION**  
thanks to the lightweight, flexi spring steel frame.

**BENEFITS**  
By stabilizing and evenly distributing the load this back system relieves strain on the back over longer distances. Effective ventilation across the back reduces the burden on the circulatory system, thereby saving energy.

TREKKING / HIKING

## AIRCONTACT BACK SYSTEM

**ENERGY-SAVING CARRYING COMFORT**  
thanks to the precise ergonomics of the back system.

**GOOD VENTILATION**  
thanks to channels between the padding and the use of breathable 3D mesh.

**BENEFITS**  
By distributing the load evenly, it saves energy and results in a more relaxed spine when carrying heavier loads. Effective ventilation across the back creates improved comfort and also saves energy.

BIKE / LIFESTYLE / HIKING

## AIRSTRIPES BACK SYSTEM

**SECURE FIT**  
thanks to the streamlined ergonomics of the back padding and carry system.

**EFFECTIVE AIRFLOW**  
thanks to reduced contact surface of the back padding with special ventilation channels between them and breathable 3D mesh.

**BENEFITS**  
The compact fit gives it stability, preventing load wobble over rough terrain. The padding with ventilation channels also has minimized contact surface, generating airflow across 80% of the back.

MOUNTAINEERING

## ALPINE BACK SYSTEM

**GOOD VENTILATION**  
thanks to channels between the back padding, covered in breathable mesh fabric.

**COMPACT FIT**  
thanks to the body-hugging ergonomics of the back padding and carry system.

**BENEFITS**  
The solid, secure fit makes it easier to maintain balance, even in challenging terrain, and make controlled movements. The ergonomics and reliable ventilation also add to the carrying comfort.

HIKING / MOUNTAINEERING

## LITE BACK SYSTEM

**COMPACT FIT**  
thanks to the body-hugging ergonomics of the back padding and carry system.

**REDUCED WEIGHT**  
thanks to lightweight construction and materials.

**BENEFITS**  
The light weight reduces strain on the shoulders and back, while the solid fit frees you up for unrestricted movement.

HIKING

## LITEAIR BACK SYSTEM

**REDUCED WEIGHT**  
thanks to its optimized skeleton structure and lightweight, removable back panel.

**BALANCED LOAD DISTRIBUTION**  
thanks to its flat-format reinforced structure and the body-hugging fit of the back panel.

**BENEFITS**  
Its ultralight weight relieves strain on the shoulders and back, and the snug fit offers improved flexibility for maximum range of movement.

TRAVEL / LIFESTYLE

## CONTACT BACK SYSTEM

**EASY ON THE BACK**  
thanks to the comfortable ergonomics of the back padding and carry system.

**BALANCED LOAD DISTRIBUTION**  
thanks to the snug, body-hugging fit.

**BENEFITS**  
The comfortable back padding, ergonomic carry system and compact fit work together to help distribute the load evenly and maximize comfort.

**ASCENDER 7**

# SPEED LITE

13, 17, 21

A lightweight, clean-lined backpack with enhanced comfort for speed hiking or active days out in the mountains.

**LIGHTWEIGHT BACK SYSTEM TO PRESERVE ENERGY**  
Stripped down to the essentials, without compromising on comfort, the lightweight deuter Lite back system combined with optimized choice of materials delivers an excellent comfort-to-weight ratio so that it uses up less energy to carry.

- Perforated shoulder straps
- 2-way adjustable sternum strap
- Adjustable & detachable waist belt
- Top pocket with zipper closure
- Safety whistle
- Attachment loops
- Mesh helmet holder sold separately
- Inner compartment
- Key clip
- SOS label

**Further Details Speed Lite 21:**

- Front pocket
- External compression straps at the sides

materials: **RECYCLED FABRIC**  
140D REC PA RS  
body fabric: 100 % recycled

**SPEED LITE 13**  
# 3410025 | 390 g | H 44 x W 24 x D 15 cm

**SPEED LITE 17**  
# 3410125 | 410 g | H 46 x W 26 x D 16 cm

**SPEED LITE 21**  
# 3410225 | 470 g | H 46 x W 28 x D 18 cm

**COMPACT FIT FOR CARRYING COMFORT**  
Wide, ergonomically shaped shoulder straps with full ventilation, supple hip fins and a 2-way adjustable, lightly elasticated sternum strap create a snug fit with zero load wobble and distribute the weight evenly between the hips and shoulders. This minimizes strain on the shoulders and the back.

# SPEED LITE PRO

17 SL, 19, 23 SL, 25, 28 SL, 30

For ambitious hikers who want to keep things fast & light in the mountains.

**ULTRALIGHT TO PRESERVE ENERGY**  
Its lightweight construction, lightweight materials, LiteAir back system and pared down features set combine to make the new Speed Lite Pro even lighter than its predecessors. This featherweight backpack weighs in at just 740 grams (Speed Lite Pro 28 SL). Which means you can put more energy into the trail and less into carrying the load.

**ERGONOMIC BACK COMFORT**  
Wide, ergonomically shaped shoulder straps with full ventilation, supple hip fins, and a precision-adjustable, lightly elasticated sternum strap create a snug fit with zero load wobble and distribute the weight evenly between the hips and shoulders. This minimizes strain on the shoulders and therefore also on the back.

**PRACTICAL OPENINGS FOR QUICK ACCESS**  
Pockets on the shoulder straps and hip fins have space for a bottle, energy bars, a cell phone or GPS device. Quick-release bungee draw cords on the shoulder straps provide fast on-the-move access to poles without having to take the pack off. So you don't have to break stride.

- detachable trekking pole attachment

materials: 235D REC PA PLAIN, 500D PA TEXTURED  
body fabric: over 50% recycled

# AIRCONTACT PRO

65+10 SL, 75+10 SL, 75+10, 85+10

For freedom-seeking adventure lovers who want to explore off the beaten track, fully self-supported, and need gear they can depend upon.

## ADJUSTABLE BACK FOR A TAILORED FIT

The VariSlide back length adjustment, interchangeable snug-fitting VariFlex hip fins, and pivoting ActiveFit shoulder straps create a tailored fit no matter what the capacity. While Air Spacer mesh further enhances the carrying comfort. The Y-shaped aluminum frame combined with the lumbar pad transfers the load effectively, and full Air Spacer mesh covering gives it ventilation and carrying comfort.

## EFFECTIVE CONFIGURATION FOR CLEAR ORGANIZATION

Various internal compartments offer practical organization for your gear. And outer pockets offer extra storage, and keep items clearly organized and within reach, such as tent poles. Spacious detachable hip fin pockets offer additional space - including for a 1.5-liter water bottle that slots neatly in a fold-out holster. Quick access via the front opening and through the spacious bottom compartment gives it added handling benefits. A detachable lid quickly converts into a day pack, with its own dedicated shoulder straps.

## DURABLE CONSTRUCTION FOR RELIABILITY

Hard-wearing materials and tougher and bigger components make this backpack more robust against wear and tear, damage, and even weather impact. An important aspect on tough, self-supported journeys.

# GUIDE ULTRA

24 SL, 26

For alpinists who keep pushing themselves and want a lightweight yet robust backpack for their ambitious projects.

**ULTRALIGHT FOR MORE ENERGY**

The clever design and use of lightweight materials plus stripped down feature set, combined with the deuter Alpine back system make this mountaineering backpack a real featherweight in its category, at just 570 grams (Guide Ultra 26). To give you more energy to put into the project at hand.

**FUNCTIONAL SETUP FOR RAPID HANDLING**

The deuter Alpine back system delivers a solid, secure fit so the pack doesn't impede agility in challenging alpine terrain, while also offering superior comfort. The roll-top opening is easy to use with gloves on, while unbreakable buckles, a detachable rope strap, and side compression straps all add to the adaptable functionality of this backpack for climbing and mountaineering.

**RIPSTOP MATERIAL FOR TOUGH PERFORMANCE**

The ripstop body fabric made of Dyneema® fibers is extremely durable, weighs less than water and is highly resistant to the impacts of abrasion, moisture, UV rays and chemicals. So that it protects contents from weather, dust, and rock. All safety related components on the pack, like buckles and hooks, are made from hard-wearing aluminum to make it even more durable and give it reliable handling in all conditions.

### FUNCTIONAL SETUP FOR RAPID HANDLING

The flexi spring steel frame lends the Alpine back system stability and support, for more comfortable distribution of the load. The roll-top opening is easy to use with gloves on, while unbreakable buckles, a detachable rope strap, and side compression straps all add to the adaptable functionality of this backpack for climbing and mountaineering.

### ULTRALIGHT FOR MORE ENERGY

The clever design and use of lightweight materials plus stripped down feature set, combined with the deuter Alpine back system, make this expedition-grade backpack a real featherweight in its category, at just 820 grams (Expedition Ultra 60). To give you more energy to put into the project at hand.

ALPINE  
back system

Ergonomic & padded  
hip fins

IPX4 water resistance  
rating

Ice axe and pole attach-  
ments on both sides

AIRSTripES

**CLEVER ORGANIZATION**

**KEEPS EVERYTHING CLOSE AT HAND**

Following years of product development and countless hours of practical experience with this spacious pack, the Trans Alpine now counts as one of the most sophisticated bike backpacks on the market and the number 1 choice for alpine traverses by mountain bike. The clever layout, with tool and pump compartments, for instance, plus a handy front stash pocket which can also accommodate a helmet, and a subdivided main compartment give this pack the kind of easy handling and clever organization you need on multi-day routes.

For mountain bikers who want a bike backpack for multi-day rides that offers a solid fit, good back ventilation, and clever stow options.

4 046051 170381

**SUPERIOR VENTILATION FOR A DRY BACK**  
The lightweight Airstripes back system with reduced contact surface and Air Spacer mesh ensures optimum air circulation, even on the most sweat-inducing ascents.

**BIKE-SPECIFIC BACK SYSTEM FOR COMFORT AND STABILITY**  
The reduced weight of the deuter Airstripes back system guarantees effective ventilation across the back and a snug, solid fit. The sternum strap, with one-handed buckle operation, combine with the hip fins to hold the pack in perfect position. Ergonomically formed, padded shoulder straps help spread the burden of heavier loads, in comfort.

- Flexible aluminum X-frame
- Breathable Air Spacer Mesh
- ActiveFit shoulder straps
- Ergonomic & padded shoulder straps
- 2-way adjustable sternum strap
- Sternum strap buckle with one-handed operation
- Ergonomic & padded hip fins
- Pull-Forward adjustment
- Zip around opening
- Stabilizer straps
- Glasses stow system
- Bicycle pump attachment
- Safety whistle
- Front pocket: mesh with hook closure
- Front pocket with zipper closure
- 2 side pockets: mesh
- External compression straps at the sides
- Hip fin pockets with zipper closure
- Rain cover included
- Reflective details
- Cell phone pocket
- Valuables compartment inside
- 2 mesh inner compartments with zipper closure
- Dedicated bladder compartment
- Hydration compatible (up to 3 L)
- Key clip
- SOS label

**EFFECTIVE ORGANIZATION FOR FULL ADAPTABILITY**  
The clever pocket and compartment configuration, plus large organizer section keep all your gear well organized and easy to access. Handy, large-format hip fin pockets, plus side pockets are also practical for quick access to items you want close at hand.

# BIKE I

16, 20

A biking backpack with easy handling that's versatile enough to cover anything from a ride around the lake to a bike & hike tour.

**COMFORTABLE BACK SYSTEM FOR STABILITY**  
The air permeable Airstripes back system generates airflow across the back - whether it's for a day ride to a nearby lake, or a bike & hike tour. The sternum strap and breathable hip fins work together to keep the pack firmly in position. Which helps out load wobble on rough unpaved trails and transfers the load away from the back.

**BIKE I 16**  
# 3202025 | 700 g | H 46 x W 23 x D 19 cm

**BIKE I 20**  
# 3202125 | 720 g | H 49 x W 25 x D 19 cm

**MULTI USE THANKS TO ADDED FEATURES**  
As well as biking, this backpack can be used for shorter hiking trips. Making it perfect for hike & bike adventures off the beaten trail. The built-in pole attachments and detachable mesh helmet holder give it added versatility.

**PRACTICAL HANDLING FOR GOOD ORGANIZATION**  
The practical configuration of compartments, pockets, and tool organizer gives this pack excellent functionality and easy, organized access.

## SUPERBIKE

# ROGLA

5

This vest-style biking backpack is for active bikers who undertake longer rides and want to keep things lightweight with maximum range of movement and good hydration.

**ROGLA 5**  
# 3207025 | 350 g | H 36 x W 25 x D 6 cm

4409 graphite-shale  
4 046051 170459

1214 grove-ivy  
4 046051 170466

**OPTIMIZED VENTILATION FOR BETTER ENDURANCE**

Ventilation is maximized thanks to perforated shoulder straps, the minimized use of lightweight materials, and the lightweight design of the deuter Lite back system in breathable mesh with added ventilation slits. This maintains temperature regulation which in turn results in better endurance on challenging longer-distance bike rides.

**SNUG, SOLID FIT FOR UNRESTRICTED MOVEMENT**

The wide, vest-style shoulder straps and soft material against the back wrap around the torso to create a seamless fit and optimum comfort. Individually adjustable sternum straps and adjustable hook-and-loop elastic side straps by the ribcage generate a precise fit and keep the pack compact, while allowing comfortable breathing at all levels of energy output.

**PRACTICAL CONFIGURATION FOR QUICK ACCESS**

Four clever pockets on each shoulder strap provide on-the-go access to tools, cell phone, energy bars, and gels. The spacious main compartment accommodates a 2-liter hydration bladder and other items required for longer rides.

- Adjustable ergonomic vest-style carrying system
- Perforated shoulder straps
- Adjustable & elasticated sternum straps
- Sternum straps buckle with one-handed operation
- Side straps by the ribcage (adjustable hook & loop)
- Zip around opening
- 2 shoulder strap pockets with zipper closure
- Glasses stow system
- Bungee cords
- Reflective details
- Bicycle pump attachment
- Key clip
- Hydration compatible (up to 2 L)

**BIKE-SPECIFIC BACK SYSTEM FOR COMFORT AND STABILITY**

The vest-style shoulder straps, sternum strap with one-handed buckle operation, and adjustable mesh hip fins combine to give this bike backpack a solid, wrapping fit, and keep it exactly where you want it on challenging trails. And the breathable Airstripes back system generates effective ventilation across the back.

**LIGHTWEIGHT CONSTRUCTION TO SAVE ENERGY**

With the improved Airstripes back system and use of ultra-light body fabric, this bike backpack has excellent comfort for its light weight, which eases the load on the back and makes it even more comfortable to ride with.

**EFFECTIVE ORGANIZATION FOR ADAPTABILITY**

The practical configuration of compartments, pockets, and tool organizer unit gives this pack excellent functionality. A helmet holder for half-shell or full-face helmet, plus attachments for protective gear and the option to extend the pack volume by 3 liters make it highly adaptable.

**INNOVATIVE BACK SYSTEM FOR EXTRA VENTILATION AND LIGHTER WEIGHT**  
The latest iteration of the deuter Airstripes back system has wide spaces between its innovative open-cell 3D-printed back padding to allow even more airflow for a dry back when riding hard. We've taken a well-balanced and minimized selection of materials and created an especially lightweight yet durable mountain biking backpack that delivers a fantastic balance of comfort and weight.

**CLEVER CONSTRUCTION**

**FOR A SECURE FIT AND RELIABLE PROTECTION**

The EPU back padding material adapts perfectly to the shape of the body, and together with the snug vest-style shoulder straps and the part-elasticated sternum strap and elasticated waist belt, it creates a snug, compact fit on the back for the most technically demanding trails. The built-in back protector in memory foam provides reliable protection for the spine, which makes it suitable for enduro racing.

**RESOURCE-FRIENDLY MANUFACTURING**

This bluesign® product creates less waste through its use of 3D printing technology. And with its recycled body fabric, and components made using environmentally friendly, resource-efficient manufacturing practices, it meets the Green Button standard, is ClimatePartner certified, and PFAS free – a clear statement of our commitment to sustainability.

**Kid Comfort Active:** For parents looking for a safe and light child carrier.

**Kid Comfort Active SL:** For mothers that hold their own and want a child carrier that fits them extremely well. Slimmer SL-shoulder straps and conically shaped SL-hip fins are especially adapted to fit the female anatomy.

- ergonomically designed hipbelt
- hip belt is easy to adjust even with heavy loads via the PullForward system construction
- load adjustment straps

- fast VariQuick back-length adjustment with large scope so both parents can comfortably carry the child
- continuously adjustable chest strap
- the sturdy aluminium frame with broad platform is tip-over resistant - very helpful when getting into the seat

- folds for transport
- different cover materials in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas
- children sweat less thanks to side mesh inserts to ventilate inside of seating area
- height-adjustable child seat with varying cushion width according to age for a healthy sitting position
- height-adjustable foot rests with adjustment to fit the child's feet
- setting the child carrier down is easy with its base that has a noticeable lock function
- two grab handles
- large, elastic and ventilated mesh pocket under child's seat with fast draw-cord closure and hook; large, elastic front pocket
- detachable, washable chin pad
- larger pillow and sun roof available as accessories
- zipped pocket on one hip fin
- key holder

materials: 210D PA

For parents looking for a safe child carrier with top comfort for their kids and themselves to explore nature together.

- continuously adjustable chest strap
- load adjustment straps
- unisex fit
- hip belt is easy to adjust even with heavy loads via the PullForward system construction

exact and stepless VariSlide back-length with wide-ranging adjustment so both parents can comfortably carry the child

- Optimum load transfer thanks to ergonomically shaped hip fins
- the sturdy aluminium frame with broad platform is tip-over resistant - very helpful when getting into the seat

- height-adjustable child's seat with varying cushion width according to age for a healthy seating position
- height-adjustable foot rests with adjustment to fit the child's feet
- frame is covered with fabric in seating area
- easily attached sun roof included
- pleasant ventilation through perforated shoulder straps
- different cover material in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas
- two zipped pockets on hip fins
- key holder
- two grab handles
- 3M reflector

# JAYPACK PRO

## 34+14

For mountain sports photographers and filmmakers who need a hard-wearing, comfortable camera backpack that's specifically designed to house their high-tech gear and protect it from the elements, while also offering secure handling for alpine use.

### ERGONOMIC BACK COMFORT

The lightweight deuter Alpine back system creates a compact, body-hugging fit for better load control and weight distribution, plus effective ventilation across the back. Which means you can move through challenging terrain in comfort, carrying a full set of camera equipment on long shoot days - without straining your back.

### JAYPACK PRO 34+14

# 3551025

Min. Weight: 2240 g without hip fins & organizer unit

Total Weight: 2500 g | H 56 x W 32 x D 21 cm

7000 black

### STURDY CONSTRUCTION YOU CAN DEPEND ON

The clever design, tailored specifically to professional photographers and filmmakers, makes it easy to use and dependable for the most challenging mountain locations. The water-repellent body fabric made from tough, abrasion resistant material makes it weather resistant and durable.

ALPINE  
back system

Front pocket for  
avalanche equipment

Clamshell zippered  
back panel

Ice axe and pole  
attachment on one side

- 2-way adjustable sternum strap

### CLEVER FUNCTIONAL FEATURES FOR EASY HANDLING

The fully modular configuration of the main compartment means it can be arranged to suit your set-up or the project you're working on. The zip around lockable back panel allows fast access to camera gear. An organizer unit can house a laptop and papers, while the front compartment is designed for avalanche equipment, with further compartments for other important gear. Attachments for an ice axe and poles as well as skis or a snowboard give this camera pack alpine functionality. A built-in weather screen props open the main compartment, while also allowing you to change lenses etc. in relative protection from snow, rain, and dust.

**JAYPACK 34+**  
# 3550022 | 2160 g | H 60 x W 30 x D 22

NEW COLOR

7000 black  
2448 grove-graphite

Whether it's a moment in sporting history, beautiful landscapes, or wildlife up close and personal, with this professional camera backpack you'll never miss a shot.

ALPINE back system

water-resistant, TPU-reinforced stable base

lockable zippered front compartment with double-padded laptop sleeve, three small, zippered pockets and a stash pocket for lens filters, flashes, light reflectors, plus loops for pens or brushes

quick and easy access to main compartment via sturdy zip around rear opening

- flexi spring steel frame for effective load transfer
- stabilizer straps
- precision-adjustable sternum strap
- detachable, ergonomic, padded hip fins with two zippered pockets
- two large stretch side pockets for water bottles or small tripod
- glasses stow system on shoulder strap
- zippered valuables pocket inside lid
- top-loading lockable lid compartment with 4 liters capacity extension for change of clothes, jacket, snacks, first aid kit etc.
- zip-through lid compartment base for direct access to main compartment
- three zippered pockets on reverse side of back panel for smaller items like filters etc.
- large main compartment with hook and loop tape dividers that can be moved to accommodate a range of sizes and types of camera gear: 5 x 1-bay dividers, 3 x small 1-bay dividers, 2 x 2-bay dividers, 2 x 3-bay dividers, 2 x 4-bay dividers

8505 turmeric-redwood

For mountaineers and trekkers looking for maximum insulation at minimal weight for extreme conditions.

Trapezoidal chamber design prevents the formation of cold spots

Dryzone: water repellent fabric with PU coating at the foot and head

- top heat-to-weight ratio and packing dimensions
- 360° insulation

- lightweight yet durable shell fabric with PFC-free DWR
- RDS certified down

- 2-way zip
- anti-snap zip baffle
- inside pocket

Thermo Stretch Comfort seams inside: faster to warm up and comfortable to sleep in thanks to the liner that stretches up to 25% across the width

PowerBox waffle structure in the lower part of the bag keeps the down in place no matter how much movement

- ThermoHood contoured hood for a cosy head with down held securely within chambers
- draft collar

- PFAS-free water and dirt repellent finish
- compression sack: lightweight, lateral compression, easy-to-use

- storage sack included - protects the down and keeps it well aired

ErgoFootPro: more sensitive foot zone is given extra space in 3D ergonomic footbox for superior insulation

Further details Astro Pro SL:

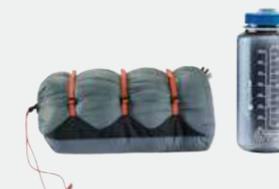

- SL models are shorter in length and the shoulder and foot sections slightly narrower

- SL models have proportionally more down fill compared to REG models

For nature-loving campers who want a good night's sleep with a clear green conscience.

Single-layer construction (Orbit SQ + 6°)

soft, cozy cotton blend lining

2-layer construction (Orbit SQ -5°)

pillow section can be zipped off and washed separately

- internal pocket
- seam-free shell fabric produces better thermal efficiency and also increases water resistance
- 360° insulation for evenly distributed fill throughout the entire bag
- contrasting drawcord toggles for easy hood adjustment in the dark
- wide opening for easy entry
- all-around zipper for quilt function
- 2-way zipper
- anti-snap zipper guard
- easy-to-use stuff sack
- zip-together function

materials: **RECYCLED FABRIC**  
Filling: HIGH-LOFT HOLLOWFIBER  
Lining: T/C  
Shell fabric : 50D REC PES RIPSTOP  
100% recycled shell fabric

# MICRO STAR

For outdoor parents who want to show their youngest members of the family the beauty of the natural world, from the comfort of a cozy toddler sleeping bag with arms and a hood.

**CLEVER DESIGN FOR EASY HANDLING**

Both the inner and outer of this 2-in-1 toddler sleeping bag come with an easy-to-use, full-length, 2-way zipper. So little ones can be tucked away and warm, in no time. The inner and outer sections are both washable.

**VERY ROBUST OUTER MATERIAL FOR VERSATILITY**

The robust shell fabric is hard-wearing, water repellent and washable. The inner bag can be used on its own on dry summer days and the outer shell can be used separately for rainy days - effectively making it a 2-in-1 suit.

**INSULATIVE MATERIALS FOR EVEN TEMPERATURE REGULATION**

The inner section of the sleeping bag is in fluffy teddy bear fleece, keeping little ones cozy and warm. And if it gets really cold, the cuffs can be folded over their hands and the hood pulled up snug over their head and ears.

**MICRO STAR SYNTHETIC KIDS**

**Starlight:** For the outdoor offspring that would like a durable companion when camping that grows with them.  
**Starlight SQ:** For the outdoor offspring that would like a resistant, cozy companion with lots of leg room when camping.

- 1-Layer-Construction
- ergonomically shaped, functional contour hood with extra-soft beading
- grows with the child: 30 cm zip extension at the foot end - when closed it serves as an additional insulation layer for the child's sensitive feet
- 360° insulation
- easy-care and robust thanks to synthetic fibre filling
- drawcord at the hood
- 2-way, centrally placed zip with easy handling for kids
- leicht zu bedienender 2-Wege-Reißverschluss
- anti-catch strip with extra reinforcement
- internal valuables pocket

Further details Starlight SQ:

- can be easily turned into a blanket by opening the all-round zip

materials: Filling: High-Loft Hollowfibre  
Lining: 75D PES  
Shell fabric: 70D PA

# STARLIGHT

## PRO, DOWN

A hard-wearing, 3-season synthetic sleeping bag and a lightweight, 4-season down sleeping bag that give budding young adventurers a cozy night's sleep and many years of outdoor enjoyment.

**ROBUST MATERIALS FOR ADAPTABILITY**  
The robust shell fabric of this sleeping bag is very hard wearing. Which means kids can use it for a wide range of situations. Whether it's a camping trip or hut-to-hut adventure, this bag can take a beating, and its light weight makes it easy to take along anywhere they go.

**LIGHTWEIGHT INSULATION PROPERTIES OF DOWN**  
Whether it's a camping trip or a hut-to-hut adventure, the lightweight down combined with the hard-wearing shell fabric of this sleeping bag make it a versatile companion for a range of uses, regardless of the season.

**GROWS WITH YOUR CHILD FOR BETTER VALUE**  
The length of the sleeping bag extends from 130 cm to 170 cm so that it grows with your child for several years - saving money as well as invaluable resources.

- Length extendable (130 cm -170 cm)
- ThermoHood contoured hood
- 360° insulation
- Multi-purpose footbox
- 2-way full-length zipper
- Anti-snap zipper guard
- Stuff sack
- Internal pocket

Further details Starlight Pro:

- 2-layer construction

Further details Starlight Down:

- H-chamber design
- Storage sack

materials: Filling STARLIGHT PRO: deuter Thermo Pro Loft  
Filling STARLIGHT DOWN: Grey Duck Down BS RDS 80/20 600+ cuin  
Lining: 50D REC PES TAFFETA  
Shell fabric: 30D PA Ripstop  
Shell fabric and lining: over 50% recycled

**CLEVER CONSTRUCTION FOR A RESTFUL NIGHT'S SLEEP**  
The soft lining in this ergonomically designed children's sleeping bag keeps them cozy from head to toe. With our 360° fill distribution and 2-layer construction the insulation is comprehensive for zero cold spots. And the multi-purpose footbox not only serves to keep little feet warm, but it also doubles as a storage bag for the sleeping bag - for transporting it or cozying up with it as a pillow to lean on or cushion to sit on.

### 360° fill system for 360° isolation

The top and bottom layers of a deuter sleeping bag are identical and contain the same amount. That's because we are aware that despite EN-norm tests assuming that a person will lie on their back, in reality, people move about in their sleep. By using our 360° fill system, we can guarantee our comfort ratings in all sleeping positions - and no more cold back!

### 100% RDS certified down: the Astro series

- No live plucking
- No forced feeding
- Traceability in the supply chain
- Animal welfare assured at all times
- Certified and controlled by accredited institutes worldwide

\*(Recommendation) Norm EN ISO23537:2022 Temperature ranges are not available for child sizes.

**INFINITI SHOPPER**

Ski

- boot bag for ski boots with soles up to 46 cm long
- large zip around opening
- mesh ventilation panel
- carrying handle
- designed for transportation of boots only
- body fabric made from offcuts

**INFINITI SERIES- MADE FROM REMNANTS**

And with it, we've managed to cut down our carbon footprint even further. By taking remnants from our production we've developed versatile, sustainable products in what we call the Infiniti series. These bags and packs are made from lovely fabric remnants from the manufacture of existing deuter products.

For the Infiniti series, we use remnants fabric from our production line that is 100% functional. This surplus fabric, which would otherwise go to waste, is turned into a series of bags and packs, thereby reducing the ecological footprint of our production. There are variations between the individual products in terms of the way these fabrics are applied, the surface area that is used and their aesthetics. But all fabrics are tested for functionality to ensure the end product is of a consistently high standard.

deuter is proud to support the 1% for the Planet nonprofit organization with sales of its Infiniti series. 1% for the Planet supports businesses and individuals in giving back to the planet in the most impactful way possible by building strategic partnerships that connect funds with causes.

By donating 10% of the buying price of the Infiniti series to 1% for the Planet, deuter is delighted to be supporting environmental projects throughout the world.

For more information about 1% for the Planet visit: [www.onepercentfortheplanet.org](http://www.onepercentfortheplanet.org)

**INFINITI SKI BAG**  
# 6900624 | 740 g | H 20 x W 190 x D 22 cm

5431 redwood scratches-graphite  
4 046051 124575

6617 cinnamon blocks-umbra  
4 046051 152073

**Climbing**

- thin, lightweight fleece lining
- simple closure system at the side
- two deep-set attachment loops for a snug fit
- brush loop

materials: 150D PES bluesign®-certified, 600D PES, Material PES fleece with TPU Backing bluesign®-certified

**GRAVITY ROPE SHEET**  
# 3391122 | 320 g | H 140 x W 140 cm

2623 teal-cinnamon  
4 046051 152110

**Climbing**

- interlocking handles carry function
- four grab handles
- color-coded corners to better locate tip and tail of rope
- Partner-Check safety label

materials: 210D PA OXFORD

**GRAVITY CHALK BAG II M**  
# 3391422 | 100 g | H 19 x W 13 x D 11 cm

5436 hibiscus-graphite  
4 046051 152097

2275 jade-ivy  
4 046051 124605

**Climbing**

- thin, lightweight fleece lining
- additional waist strap with sturdy buckle
- two brush loops
- two deep-set attachment loops for a snug fit
- soft-feel fabric and wire rim for easy handling
- zipper pocket on back (for keys, money or tape)

materials: 140D PA RIPSTOP HT FD bluesign®-certified, 600D PES bluesign®-certified

**GRAVITY ROPE BAG**  
# 3391022 | 590 g | H 22 x W 48 x D 30 cm

2623 teal-cinnamon  
4 046051 152103

**Climbing**

- deuter rope groundsheet incl.
- long straps for crossways carry
- zipper pocket with key clip
- compression straps with metal hooks
- different strap colors for easy alignment
- SOS-label

materials: 210D PA OXFORD

**GRAVITY CHALK BAG II L**  
# 3391522 | 110 g | H 21 x W 13 x D 11 cm

1397 neptune-nightblue  
4 046051 165448

2623 teal-cinnamon  
4 046051 152080

**Climbing**

- thin, lightweight fleece lining
- additional waist strap with sturdy buckle
- two brush loops
- soft-feel fabric and wire rim for easy handling
- two, deep-set attachment loops for a snug fit
- zipper pocket on back (for keys, money or tape)

materials: 140D PA RIPSTOP HT FD, 600D PES bluesign®-certified

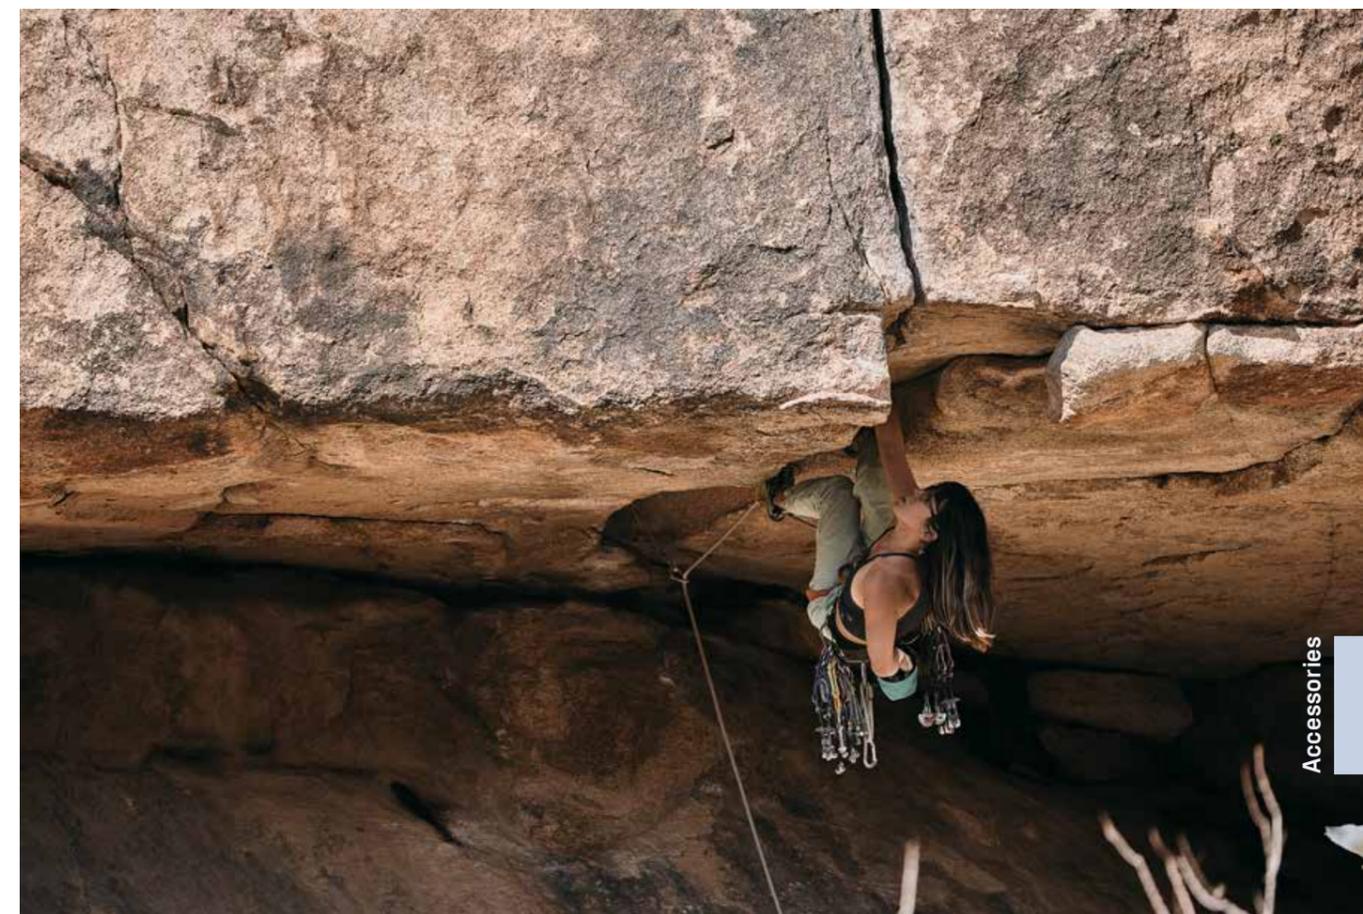

**GRAVITY BOULDER BAG**  
# 3391222 | 185 g | H 28 x W 30 x D 21 cm

5613 redwood-clay  
4 046051 124544

**Bouldering**

- thin, lightweight fleece lining
- extra-large opening
- easy-access hook-and-loop tape closure
- airtight roll-top closure - keeps chalk dry and stops it escaping
- two zipper pockets on the back (with key clip)
- three sizes of brush loop
- stash pocket
- main fabric recycled

materials: **RECYCLED FABRIC**  
330D PA RECYCLED TEXTURED / 600D PES bluesign®-certified

9703 koi-black

- Wind- and waterproof foil bivi bag
- Body fabric lightweight and hard wearing
- Heat-reflective insulation
- Reusable if used with care
- Includes storage bag
- For 1 person
- Small pack size
- High visibility color

materials: 100% PES FOIL WITH AL COATING

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for deuter. Performance, deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We only use PFAS free finishings.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure, and application-oriented mix of raw materials also plays a role.

The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

**YKK® zippers:** The most high-quality zippers available on the market are absolutely robust and reliable.

**Multi-chamber aluminium profile rails:** The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

**Permanently elastic spring steel frames:** Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFAS free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ration. Furthermore it is highly breathable, long-lasting, and easy to clean. Its short drying time is another benefit.

Its high level of elasticity supports freedom of movement of the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

FILLING SLEEPING BAG

**Synthetic**

**High-Loft Hollowfiber:** Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

**Thermo ProLoft®:** A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties - a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

**Combining:** deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

**Down**

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) - benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

**Composition:** The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

**Fill power / cuin:** High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
